SUMMARY

Fourth-year Computer Science student specializing in front-end development and software development with strong UI/UX design capabilities. Experienced in building responsive web and mobile applications with React, React Native, Vite, Flutter, and Supabase. Proficient in transforming Figma designs and Blender 3D assets into interactive, performant, and user-centered digital products.

TECHNICAL SKILLS

- Front-End Development (React, Vite)
- Mobile Development (React Native, Flutter)
- UI/UX Design & Prototyping (Figma)
- 3D Modeling & WebGL (Blender, Three.js)
- Python, JavaScript (ES6+) & TypeScript
- HTML5 Semantic Markup & CSS3
- CSS Grid, Flexbox & Responsive Layouts
- Backend & Authentication (Supabase)
- Relational Databases (PostgreSQL, SQL)
- Version Control (Git & GitHub)
- REST APIs & Data Synchronization
- Machine Learning & NLP (PyTorch, HuggingFace)

CORE COMPETENCIES

- Creative Problem-Solving
- Visual Thinking
- Attention to Detail
- Adaptability
- Curiosity & Continuous Learning
- User-Centered Thinking
- Initiative
- Collaboration & Communication

Ghayzelle Dizon

FRONT-END DEVELOPER | UI/UX DESIGNER

TECHNICAL PROJECTS & EXPERIENCE

Gaze.d – Interactive 3D Portfolio | *React, Three.js, Vercel*

- Designed and deployed an interactive 3D web experience presenting technical skills, engineering projects, and qualifications in an immersive spatial environment.
- Created custom 3D low-poly models in Blender and integrated them with WebGL/Three.js for smooth 60 FPS viewport rendering and lighting.
- Structured responsive navigation and accessible spatial controls bridging visual creativity with user-centered interaction.

Plan_.ed – Shopping & Errand Planner App | *React Native, Expo, Supabase, AsyncStorage*

- Engineered a cross-platform mobile shopping planner featuring custom light/dark themes, collapsible headers, and an interactive errand calendar with native reminder alarms.
- Built dynamic smart checklists with automated cost calculation and a shopping directory linked across 4 major Pampanga malls.
- Implemented local offline caching with AsyncStorage and cloud sync with Supabase PostgreSQL, shipping APK builds via EAS Build.

C&J Real Estate – Property Showcase & Management | *React, Vite, Supabase, PostgreSQL, EmailJS*

- Architected a full-stack real estate platform and session-authenticated Admin Portal with Supabase for real-time CRUD property listings, transaction status, and inquiry leads.
- Developed an interactive showroom with dual-thumb price filters, dynamic Philippine geographic selectors, and multi-property inquiry carts.
- Automated client inquiries using EmailJS and created mobile-responsive CSS3 layouts delivering sub-second load times.

HAUtogo – Campus Navigation & Faculty Tracking | *Flutter, Dart, Supabase, flutter_map*

- Collaborated on a campus mobile application for Holy Angel University displaying live faculty room locations on an interactive map with sliding panel UI.
- Built weekly schedule views with one-tap navigation, geofencing logic, and secure multi-role Supabase authentication.

Customer Support Assistant – NLP & RL Conversational Agent | *Python, PyTorch, DistilBERT, LinUCB*

- Architected an end-to-end NLP and Reinforcement Learning assistant to analyze customer inquiries, predict intent, and generate personalized, context-aware responses.
- Fine-tuned a DistilBERT transformer model with PyTorch and HuggingFace, benchmarking performance against baseline TextCNN models with GloVe embeddings.
- Integrated a LinUCB contextual bandit algorithm to optimize dynamic response selection via real-time reward signals and regret minimization.

EDUCATION

Bachelor of Science in Computer Science | **2023 – Present**
Holy Angel University – Angeles City, Pampanga
• Academic Honor: Dean's Lister (1st Year 1st Sem, 2nd Year 1st Sem, 3rd Year)

Senior High School – STEM Strand | **2021 – 2023**
Holy Angel University – Angeles City, Pampanga
• Academic Honor: Graduated With Honors

CERTIFICATIONS & TRAINING

- Responsive Web Design — freeCodeCamp
- JavaScript Essentials 1 — Cisco Networking Academy
- Relational Database — freeCodeCamp
- AWS Academy Graduate – AWS Cloud Foundations — Amazon Web Services
- Additional Training (Cybersecurity & Networks): CCNA: Intro to Networks, Cyber Threat Management, Endpoint Security, Ethical Hacker — Cisco Networking Academy
- Additional Training (Data & AI): Data Analytics Essentials, AI Fundamentals with IBM SkillsBuild — Cisco Networking Academy & IBM
